POST Create User

[Open Request →](#)

127.0.0.1:7000/users

Add request description...

Body raw (json)

json

```
{
  "userName": "Berta",
  "password": "1234",
  "email": "robertafofinha@gmail.com",
  "strideLength": "2.5"
}
```

Example

Success

Request

cURL

```
curl --location --request POST '127.0.0.1:7000/user' \
```

Example

Success

Request

cURL

```
curl --location --request POST '127.0.0.1:7000/user' \  
--data-raw '{  
  "userName": "Roberta",  
  "usersPassword": "fofinha"  
}'
```

Response

Body Headers

json

```
{  
  "id": 4,  
  "userName": "Roberta",  
  "usersPassword": "fofinha",  
  "userQuests": []  
}
```

DEL Delete Users

[Open Request →](#)

127.0.0.1:7000/users

Add request description...

Example

Success

Request

cURL

```
curl --location --request DELETE '127.0.0.1:7000/user/all'
```

Response

Body Headers

No response body

This request doesn't return any response body.

Foto
